

MASTERSTROKE – AI Validation & Governance Engineer

Enterprise AI Testing, Risk & Governance Engineering

A specialist program for professionals responsible for ensuring AI systems are safe, testable, auditable, and enterprise-ready.

This program avoids generic ethics theory and policy-only compliance. The focus is hands-on validation, governance engineering, and production monitoring for real AI systems.		
PHASE 01 	Foundations of AI Validation AI failure modes, validation philosophy, and enterprise risk surfaces.	12 Hours
PHASE 02 	Model, Prompt & Output Testing Deterministic testing, prompt validation, output constraints, regression testing.	16 Hours
PHASE 03 	Bias, Fairness & Hallucination Detection Bias testing, fairness metrics, hallucination detection techniques.	14 Hours
PHASE 04 	Human-in-the-Loop (HITL) Systems Review workflows, escalation paths, approval systems, override design.	12 Hours
PHASE 05 	Governance, Auditability & Compliance Audit trails, traceability, ISO/SOC2 alignment, regulatory mapping.	16 Hours
PHASE 06 	Production Monitoring & Incident Response Drift detection, alerting, incident workflows, rollback strategies.	14 Hours
CAPSTONE 	Enterprise AI Governance Capstone Design and defend a complete AI validation and governance framework.	12 Hours

TOTAL PROGRAM INTENSITY

96 HOURS

Enterprise Validation & Governance Track

“You make AI systems safe, testable, and defensible in production.”
