

MASTERSTROKE – Agentic AI Systems Engineer

CURRICULUM ROADMAP

A multi-phase professional engineering track designed to master the architecture, safety, and orchestration of agentic systems.

	PHASE 01 Foundations of Agentic Systems State-aware design, autonomous loops, and the theory of LLM agency.	12 Hours
	PHASE 02 Logic Layer & n8n Orchestration Advanced workflows, API integrations, and conditional logic.	24 Hours
	PHASE 03 Multi-Agent Architectures Coordination strategies, supervision, CrewAI patterns.	18 Hours
	PHASE 04 Memory & Planning Loops Vector memory, recursion, planning modules.	14 Hours
	PHASE 05 Production Hardening & Safety Deterministic execution, governance protocols.	12 Hours
	ADVANCED MODULE LangGraph Mastery Complex state machines and custom agent logic with LangGraph.	16 Hours

TOTAL PROGRAM INTENSITY

96 HOURS

Full Comprehensive Engineering Track
