

MASTERSTROKE – GenAI Platform Architect

Enterprise GenAI Architecture & Platform Design

An advanced architecture-focused program for professionals designing secure, scalable, enterprise-grade GenAI platforms.

This program is not about prompting, agent building, or low-code workflows. It focuses on platform-level decisions, architectural trade-offs, and long-term sustainability of GenAI systems.

PHASE 01

Enterprise GenAI Foundations

Platform fundamentals, reference architectures, and enterprise constraints.

16 Hours

PHASE 02

Provider Abstraction & Model Routing

Multi-provider strategies, fallbacks, and cost-aware orchestration.

20 Hours

PHASE 03

Multi-Tenant GenAI Platforms

Tenant isolation, access control, and platform governance.

18 Hours

PHASE 04

Reliability, Scaling & Cost Control

Observability, performance engineering, and FinOps.

14 Hours

PHASE 05

Governance, Security & Compliance

Enterprise approvals, auditability, and risk controls.

16 Hours

Enterprise GenAI Platform Capstone

End-to-end platform architecture design and defense.

12 Hours

TOTAL PROGRAM INTENSITY

96 Hours

Enterprise-grade architecture track
